RGL14

The RGL14 is supplied in two standard lengths: **1.3 Mtr**
1.8 Mtr

The RGL14 Twin Leg lanyard is an industry standard for **restraint** lanyards, and normally the minimum equipment issued with a harness for working at height.

The 40kN webbing used in the manufacture provides greater strength compared to other webbing and systems.

This lanyard should be used when the operative is working from a static position, connected to a fixed anchor point. Movement between anchorages can be achieved by means of double clipping.

This lanyard can be fitted with any compatible EN362 Karabiner

(For details of daily inspection procedures, see the info sheet)
